ABOUT ME

As a software developer, I deliver end-to-end solutions across diverse domains, including mobile, desktop, and embedded systems, with a strong focus on system design and process optimization. I possess hands-on experience in troubleshooting complex architectures, optimizing multithreaded structures, and ensuring seamless hardware-software integration. Leveraging my strong adaptability to rapidly grasp and implement new technologies and dynamic workflows, I aim to bring immediate value and efficiency to your engineering teams.

TECHNICAL SKILLS

Languages: Dart, C#, Python **Backend & APIs:** REST API entegrasyonu, Supabase, Firebase **Databases:** PostgreSQL, Firestore
Frameworks & Tools: Flutter, Riverpod, go_router, .NET, WPF, Windows Forms
Concepts: MVVM, Multithreading, Cross-Platform, System Integration **Embedded & Systems:** ESP32, RPi, ROS, UART

JOB EXPERIENCE

Software Developer — SANCAKTAR Mekatronik Sistemler

07.2025 – 03.2026

- Integrated advanced system architectures and optimized multithreaded structures, significantly increasing application responsiveness and operational efficiency.
- Initiated the transition to a cross-platform architecture, enabling the same codebase to run seamlessly on both Linux and Windows while reducing development costs.
- Established a real-time, bidirectional serial communication infrastructure between the embedded control board and the desktop application, maximizing data transmission reliability.
- Designed and implemented REST services and database schemas for centralized measurement data management, ensuring absolute data consistency.

Software Developer (Project Based) — UGF Makine Sanayi ve Ticaret A.Ş.

07.2025 – 01.2026

- Designed an IoT-based smart system architecture, achieving significant efficiency gains in setup and synchronization times.
- Developed remote-control mobile interfaces using Flutter, aligned with core business objectives.
- Built a scalable backend infrastructure based on Supabase and PostgreSQL to ensure the secure storage of device data.
- Implemented an ESP32-based Wi-Fi AP access point architecture for initial device configuration.

Software Developer Intern — Nefel Hassas Tarım

06.2025 – 08.2025

- Optimized the user interface and control logic of the autonomous robot control system.
- Implemented serial communication-based command protocols for robot movements to ensure reliable data transmission.
- Processed sensor data to design an end-of-row U-turn movement algorithm for in-field navigation.
- Completed the ROS (Robot Operating System) setup on Raspberry Pi and finalized hardware-software integration.

PROJECTS

- CrestBalance** — An Erasmus-focused mobile application offering multi-currency budgeting, grant tracking, and group expense splitting; it simplifies financial management with features such as debt summaries, debt settlement, and expense tracking.
 - Technologies Used:** Flutter, Supabase, PostgreSQL, Riverpod, FCM, Cursor
- Voice2 Note AI** — A note-taking application that converts speech to text via voice recording and file import; it features server-based transcript architecture to deliver performance-driven summarization, search, and PDF generation.
 - Technologies Used:** Flutter, FastAPI, SQLite, Riverpod, faster-whisper, ffmpeg, Cursor
- SmartSprinkler** — An IoT irrigation prototype offering ESP32 device configuration (Wi-Fi AP mode), weekly watering scheduling, and remote control via a mobile application.
 - Technologies Used:** Flutter, Supabase, PostgreSQL, Supabase Realtime, ESP32, Wi-Fi (AP Mode), Cursor
- QuizArea** — A gamified English vocabulary learning mobile application featuring quiz-based exercises, progress tracking, and user authentication.
 - Technologies Used:** Flutter, Firebase, Firestore, Kimlik Doğrulama
- AgroMora** — A mobile e-commerce application featuring role-based authorization.
 - Technologies Used:** Flutter, Supabase (Kimlik Doğrulama, Veritabanı), PostgreSQL

EDUCATION

Muş Alparslan Üniversitesi | 2022-2026

Bachelor of Science in Information Systems and Technologies

- GPA: 3.10 / 4.00
- TEDx Community Team Member
